

## Agenda 47 | Rebuilding America's Depleted Military

*"Less than three years ago, I'd fully rebuilt the United States military and steered America into such a strong global position. ...peace was breaking out all over the world, we had peace through strength"*

- On Day One, President Trump will restore his successful America First foreign policy to bring peace and stability to Eastern Europe. We want people to stop dying.
- He will ask Europe to reimburse the United States for the money we spent to rebuild stockpiles sent to Ukraine.
- President Trump will restore the proud culture of America's armed forces and honor its traditions. No Marxism or communism will be allowed, and he will rid the military of fascists. This will increase and encourage recruitment. Patriotic recruits will again join our armed forces.
- Donald Trump will take a long, hard look at defense procurement. Too much money is spent on the Pentagon while our defense industrial base is withered down to nothing. It is unacceptable that our military would run out of ammunition or be unable to quickly produce the weapons needed.
- President Trump will get more value for every dollar spent. There will be record funding for our military, as was done in his first administration. Today, too much money is spent "foolishly" and prices for military supplies are too high.

***Donald Trump's powerful foreign policy vision will deliver peace and strength. Once again we will have a President who wants to prevent war, save lives, and stop wasting taxpayer money.***
