

## Agenda 47 | Protecting Americans by Taking on Big Pharma and Ending Global subsidies

*"... I was the only President in modern times who EVER took on Big Pharma, and I took it head on. Biden canceled my tough-on-pharma policies the moment he had a chance."*

- On Day One, President Trump will sign an Executive Order to end global subsidies paid for by American consumers once and for all.
- Under my policy, the United States government will tell Big Pharma that we will only pay the best price they offer to foreign nations otherwise known as The Most Favored Nation Rule.
- This policy was in place when I left office, but shortly after taking office, Joe Biden rescinded my Executive Order, stabbing Patients and U.S. citizens and especially our Seniors right in the back.
- This will force Big Pharma to REDUCE prices very substantially for American Patients. It will deliver huge savings for seniors, and for all American Patients.

***Donald Trump continues to express his dedication to improving the overall price and quality of health care for all American citizens.***
